

Synchronicities

The higher the quality of intent, the more sophisticated the response from nature and nature's system of success. The Universe's capacity to respond to higher-octave intent fills in the details and "leapfrogs" our creations into still greater creations and synchronicities. Ultimately, this can be seen as a geometric progression and harmonious outpouring that has to be experienced to be believed. Similar to a pebble thrown into a quiet pond with the exponential and concentric ripple effect capable of continuing on and on, much of the subtleness of the Universe's response and insight remains unseen. And, of course, the appearance of synchronicities and coincidences are vivid indicators of the Universe in action – echoes of an interactive Universe.

Dr. Hawkins' Map of Consciousness

As we refine our capacity to create and align with nature and the rhythm that is the Universe, we discover how very much we are capable of being on track. Accessing synchronicities, coincidences, happenstances and serendipitous outflowings to light our way is only the beginning. As our thoughts and desires generate higher and finer feelings, we find ourselves living within heightened experiences and senses of well-being.

Dr. David R. Hawkins, M.D., Ph.D., and author of one of the more exciting and compelling books on consciousness titled *Power vs. Force*, has clearly identified the Universe's capacity to respond to higher quality intent.

Undoubtedly there is a pecking order to thought and quality of intent, and thus reality creation! Dr. Hawkins, a psychiatrist, researcher, director of the Institute for Advanced Theoretical Research and past co-author with Linus Pauling, has used kinesiology (muscle testing) for more than 20 years to research and extensively delve into the inner-workings of Universal Forces and their obvious hierarchy. Much of this

VISIONARIES THRIVE IN ALL TIMES

research is published as *Power vs Force* (1995), *The Eye of The I* (2001), and most recently, *I: Reality and Subjectivity* (2002). One of the many things he has discovered and carefully documented is that consciousness can be mapped and gradated on a scale between 0 and 1,000, with guilt and shame at one end and the states of joy and enlightenment at the other.

According to Dr. Hawkins, man's drives and desires, based on the low end of his "Map of Consciousness," engender "attractor fields" that have weak continuity and connection with Source (similar to the earlier concentric circle example). As we climb the Map of Consciousness, we find Innate Intelligence much more able to align with our capacity to create (attract) and bring about harmonious outpourings and expansion into our lives. As we select our thoughts, our focus and our prayer, we find the underlying quality of intent (attractor fields) playing a tremendous part in the quality, stability and far-reaching characteristics of that which unfolds in our lives.

(Dr. Hawkins' Map of Consciousness is unavailable for reprinting. A quick review would indicate the lower states of humanity are rated between 0 and 175 and include the underlying qualities of intent of shame, guilt, apathy, grief, fear, anger, guilt, pride, etc. The break-even point at 200 [labeled courage] allows access to the mid states of neutrality, willingness, acceptance, reason, love, joy, peace, etc., falling between 200 and 700. And the states of enlightenment range between 700 and 1,000.¹ The map is available in his books and through his Web site at www.veritaspublish.com.)

As we create with higher-quality intent, we align with Source in a geometrically progressive manner, for which our creations are significantly more powerful, fast approaching, far-reaching and stable. This higher quality alignment with Source also brings considerable awareness of nature jockeying "reality" about to best suit our needs, for which we have devised terms such as coincidences, serendipitous events, synchronicities, etc.
